coating

It's time to raise the bar in architectural powder coating.

Welcome to Ideal Coating the new leader in the aluminum powder coating industry. Ideal Coating's goal is to raise the bar in the powder coating process by using only the finest products and skilled certified technicians. Ideal offers a state of the art 630 ft. circumference coating line with an impressive 30" x 108" opening.

About Ideal Powder Coating

Ideal Coating features an automated line with automatic paint guns that can handle some of the industry's largest dimensioned needs. Our procedures and systems are designed to make sure your products are coated to your satisfaction. When you choose Ideal Coating, you are buying more than just powder coating. You're getting the expertise and experience of Ideal Coating professionals who are proudly committed to your satisfaction. We stand behind our coating with some of the best warranties in the business.

Go Green with Ideal Powder Coating

Ideal Coating has a proud history of environmental stewardship. Ideal's commitment to safeguarding the environment includes the use of coatings which emit zero or near zero volatile organic compounds. Our process produces substantially less waste than conventional liquid coating processes, and we have an efficient use of material (95%) due to recovery of overspray.

Advantage of Powder Coating

- About the same cost as professionally applied paint
- Environmentally friendly because it is solvent-free
- High mechanical properties
- Application of a single coat can produce a thickness of approximately 2-4 mils
- Excellent edge protection
- Optimum results after a single coat application
- Virtually unlimited choice of colors, textures & finishes

Go **green** with
powder coating
